### Industrial Cranes

The JC 212 can lift up to 12 tonnes and the JC 215 has a lifting capacity of 15 tonnes. Both cranes have road speeds in excess of 45 km/h enabling them to move quickly from site to site. Four wheel steering is a standard feature on both cranes so they can tackle all of those small lifting jobs, even in the tightest of spaces.

### All Terrain Cranes

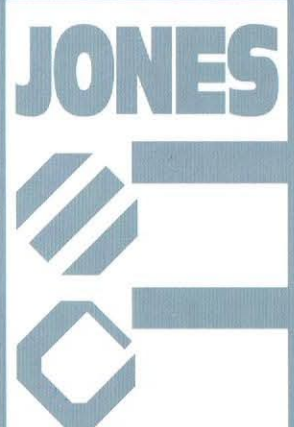

The compact JC 415 has a lifting capacity of 15 tonnes and a road speed of 65 km/h. The JC 425 and the JC435, can lift 25 tonnes and 35 tonnes respectively and have road speeds of 70 km/h and 64 km/h. All models in the Jones all terrain range have been designed to meet today's requirements for fast travel cranes that are equally at home on paved areas or off highway conditions.

### Rough Terrain Cranes

We offer a range of seven rough terrain cranes with lifting capacities from 12 to 50 tonnes. From the highly manoeuvrable JC 612 to the powerful JC 650, all of these cranes will operate in the toughest of terrains under some of the world's most extreme climatic conditions.

# JONES THE JONES NAMES FOR CRANES

### Lattice Boom Cranes

With lifting capacities up to 100 tonnes the Jones range of mobile, self propelled lattice boom cranes can operate anywhere in the port area or stockyard. They are easy to operate and simple to maintain. Fitted with a high level cab they afford the driver full vision even into a ship's hold. Whatever the cargo, there is a Jones crane to lift it - quickly and efficiently.

### Factory Rebuilt Cranes

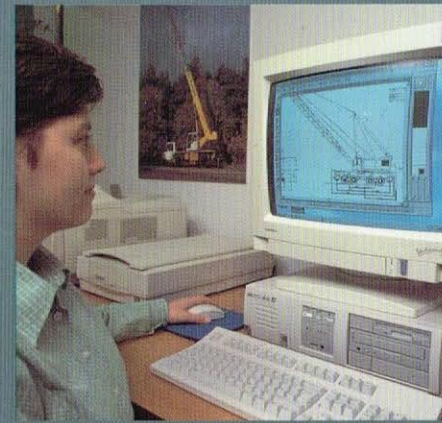

Most models of mobile cranes we have produced are available as fully refurbished units. Our factory rebuilt cranes are fully stripped down and rebuilt to their original specification. They all carry a full warranty and give you a good as new crane at a highly competitive price.

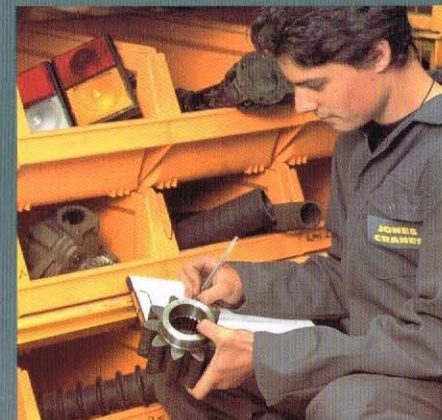

### Spares & Service for all cranes

Avoid downtime, improve efficiency and be more profitable. Jones Cranes provide the back-up to keep your cranes working, day after day and year after year. Even the best machines need servicing and we can offer you a complete package, from basic service to total rebuild. Our international network of dealers and agents is there to provide the additional support you need to look after your cranes throughout the world.

## Jones a tradition for over 80 years

Over the last 80 years, Jones Cranes have designed and manufactured over 14,000 cranes, which have been sold to customers the world over.

For as long as we have been in business we have led the field in the manufacture of mobile cranes that have been innovative in design and highly reliable in operation, confirming our position as one of the world's leading crane producers.

Today, our objective is to offer you the best. Whether it is a new crane, a rebuilt unit, quality spare parts or after sales service, Jones Cranes give you total reliability without compromise.

All our products are supported by our network of overseas distributors plus our team of experienced, factory based technical personnel. We hold a comprehensive stock of spare parts, not only for new cranes but for many of the old Jones Cranes models which are still operating throughout the world.

This dedication to our customers is the principle reason why Jones Cranes are still market leaders in mobile cranes.

## Jones After Sales Service

Either in our factory or on your site, our engineers will keep your Jones crane in prime condition. They are trained to detect and remedy potential faults before they arise thereby improving reliability and minimising downtime. We can offer on site inspections or contract maintenance schemes which can be tailored to your own specific requirements. So that you meet statutory regulations we can also undertake full crane testing programmes and certification.

## Jones Partex/Service Exchange

The 'Partex' service exchange scheme has been introduced to provide customers with the opportunity of replacing major components at prices significantly below those of new spare parts.

## Jones Reconditioning

To improve your crane's performance and reliability we can recondition your crane, often on site, according to your own specific requirements and budget.

## Jones Factory Rebuilds

Factory rebuilt Jones Cranes with full warranty within the UK for six months or 1,000 working hours of operation. Available from our stock or rebuilt to the customer's own specification.

Most models of Jones Cranes are available under the scheme. They are completely stripped, inspected and rebuilt using only genuine parts to meet the original exacting specifications. They can be painted in customer's own livery if required.

A Jones rebuilt crane represents exceptional value, for a guaranteed product, at a fraction of the cost of a new crane.

All these services are designed to give you the maximum return from your wise investment in a Jones Crane.

ALL AROUND THE WORLD, WHEREVER YOU GO, WHATEVER THE CARGO THERE IS A JONES CRANE TO LIFT IT - QUICKLY AND EFFICIENTLY.
