

# SPECIALTY BODIES - ARTICULATED

**Ground Force is your solution for any specialty body application that you can dream up.** We engineer and custom design the bodies with your input, to meet your individual needs.

Whether it's a Tipper body designed to withstand stresses from loaded containers or an Ice Road truck able to constantly deliver in frigid temperatures - Ground Force will custom design it to suit your needs.

## ICE ROAD WATER TRUCKS

- Mild steel with low profile body
- Hydraulic operated pumping system
- 104 KBTU heating system
- Dust suppression water system
- Intermittent spray package
- Designed for precise delivery of water for Ice Road building
- Fully insulated

## SEACAN HAULER/TIPPER BODIES

- Heavy-duty bed designed to withstand stresses from loaded container
- Fully welded structural steel construction
- Utilizes OEM rear pin bosses for attachment & bed hoist cylinders
- Container pockets are tapered for guide placement/alignment
- Electrically-actuated container locks with independent function controls in operator cabin
- Load-lock status indicator lights in operator cabin

## SOIL STABILIZER TRUCKS

- Sloped body hopper design
- Dual chain conveyor and auger distribution system for cement off-load
- Optional dust suppression water system
- Hydraulic pump and control system
