

WATER TRUCKS - ARTICULATED

Ground Force's line of rugged Articulated Water truck bodies are durable and efficient. Trucks range in size with capacities up to 8,000 gallons, and a array of options.

Ground Force watering equipment plays an integral part in the most demanding mining and construction projects. Investing in Ground Force quality watering equipment pays for itself in durability, performance and reliability.

STANDARD TANK SPECIFICATION

- Dual-radius semi-elliptical design
- Built for heavy mining application
- Fully baffled; longitudinal and transverse
- Tub-surge control system
- “Endo-skeleton”, made of structural I-beams inside tank for added stability
- Hydraulic lines through tank for cooling
- Designed to achieve lowest center of gravity
- Banded manway with safety grate
- Ladder with safety rail
- Anti-skid top walkway with PPE tie-off
- Sump with drain for clean out
- Sealed weatherproof wiring
- Tail, stop and turn lights
- Kit form or GFM installation available

STANDARD SPRAY EQUIPMENT

- Externally mounted water pump
- Rear spray bar with staggered fan-sprays
- In-cab control console
- Extensive range of options available (side sprays, hose reels, water cannons, gravity dumps, etc.)
