Improve your grades.

The D-Series Tandem-Drive Graders are producing superior grades in a wide variety of applications — and earning high marks from experienced operators throughout North America. Designed with extensive input from owners and veteran operators, and further refined

through their ongoing scrutiny, the 670D, 770D, and 870D are simply the best. Packed with best-in-class productivity-boosting advantages like their patented EBS transmissions, the D-Series will help you achieve better grades, too. To learn more, read on.

With the addition of the 235-net-hp, 40,630-pound 870D, you now have a choice of three John Deere tandem-drive graders.

Fuel-efficient Tier 2-certified PowerTech™ Deere engines deliver impressive torque rise and peak torque for best-in-class, low-rpm pull-through power.

Innovative Event-Based Shifting (EBS) transmission senses the load while automatically adjusting clutch-pack engagement, for the smoothest shifting transmission in any grader. There's nothing else like it.

Moldboard shape, throat clearance, and draft-frame geometry enhancements improve material flow across the blade.

Spacious cabs with floor-to-ceiling tinted glass provide daylong comfort and unsurpassed visibility.

Familiar low-effort levers command a Pressure-Compensated Load-Sensing (PCLS) hydraulic system for precise, predictable response and fine-grading control when blue topping.

Fewer lock-to-lock turns reduce arm motion while providing just the right amount of steering response and control.

With five true working speeds below 9.3 mph, and a top speed of 25 mph, it's easy to match ground speed to the work.

EBS provides extremely smooth direction changes without engaging the inching pedal.

Pressure-compensating load-sensing hydraulics deliver consistent feel, response, and low-effort control — everything an operator needs for making fine adjustments when blue topping.

Pushbutton-activated cruise control helps reduce operator fatigue. Simply tap the brake or depress the throttle to return to manual operation.

Differential lock can be engaged on-the-go and under full load for extra traction at any speed.

1

1. Backlit pushbuttons give convenient fingertip control of the saddle lock, lights, window washers and wipers, and window and mirror defrosters.

2. Familiar low-effort industry-standard controls deliver predictable, consistent response.

3. Although EBS makes it virtually unnecessary, the inching pedal gives additional low-effort control.

A yellow John Deere D-Series Grader is shown from a low-angle perspective, moving along a dirt road. The operator is visible in the cab. The background features a desert landscape with mountains under a clear sky. The text "More productivity is at your command." is overlaid in large white font with a black outline.

More productivity is at your command.

The D-Series Graders put maximum productivity easily within reach. Best-in-class lever efforts are combined with Pressure-Compensated Load-Sensing (PCLS) hydraulics to ensure a consistently predictable and precise response. Short-throw levers deliver familiar low-effort control of

the blade, circle, wheel lean, articulation, and front and rear tools. And you won't find a smoother grader, either. Deere's exclusive EBS transmission delivers smooth-as-silk gear changes and transitions from forward to reverse, for exceptional control and grading precision without extra effort.

Seeing is believing.

It's easy to see what a Deere grader can do. With 40 percent more glass than before, your operators will benefit from the D-Series' virtually unobstructed

all-round visibility. And to help keep the view clear, an enhanced, more efficient HVAC system moves 64 percent more air — eliminating the need for noisy bus fans.

Floor-to-ceiling tinted glass yields a commanding view of the blade heel and toe, back of the cutting edge, and front tires.

Bonded windows allow a greater expanse of glass. Even the door latches were designed to maximize visibility.

Additional halogen work lights and a high-amp alternator provide better illumination of the entire work area. Highly reliable, energy-efficient LED brake and turn-signal bulbs are standard equipment.

LCD monitor is optimally positioned where it can be easily observed while focusing on the work ahead.

All-around visibility is clearly superior. Floor-to-ceiling side glass, expansive rear glass, and large adjustable mirrors help the operator stay aware of surrounding obstacles.

1. Adjustable front and rear shades, tinted glass, and extended roofline reduce sun glare.
2. Front and rear intermittent wipers and rear window defogger are standard. Heated mirrors are available.

Enhanced HVAC system employs 13 directional vents for superior cooling that helps keep the cab comfortable.

Tightly sealed, isolation-mounted ROPS cab provides best-in-class quietness to help reduce operator fatigue. Enables you to hear the radio or CD player, too.

With numerous overhead compartments, plus a place for a beverage, cooler, and cell phone, there's no shortage of storage space.

Optional deluxe air-suspension armchair adjusts multiple ways for daylong comfort and support.

1. Self-cleaning, slip-resistant steps, ergonomically placed grab bars, and wide entryways ease cab entrance and exit.

2. Fully adjustable console lets an operator position the control levers and steering wheel where they're most comfortable. Moves out of the way for more walk-through room.

3. Advanced multi-language monitor with LCD display, analog gauges, and LED indicators provides vital operating info at a glance.

4. Available swing-out front windows and sliding side glass enhance ventilation inside and enable easier communication outside.

5. Standard 15-amp converter and two outlets provide plenty of power for cell phones and other electronic devices. A 30-amp converter is also available.

More comfort means more productivity — by a wide margin.

Whoever said, “No pain, no gain,” has obviously never been aboard a D-Series Grader. The completely rethought ROPS cab won’t cramp an operator’s style. With 26 percent

more room than before, generous storage, and a more efficient HVAC system, comfort and convenience have been noticeably enhanced. For more gain without the pain.

Nothing runs like a Deere, because nothing is built like one.

Downtime is lost time. That's why each D-Series Grader boasts traditional John Deere durability and reliability features. Such as a high-strength mainframe, heavy-duty wet-sleeve diesel engine, and inboard-mounted self-adjusting wet-disc brakes. Add to those

state-of-the-art advances such as a solid-state electrical-distribution center, sealed touch pad, and multifunction diagnostic monitor, and you've got a grader that's got what it takes to keep on keeping on. When you know how they're built, you'll run a Deere.

Sealed transmission electrical connectors prevent moisture and contaminants from entering terminals.

Self-adjusting wet-disc brakes are mounted inboard, where they run cool, clean, and unexposed to corrosive materials. Unlike air systems, they require virtually no maintenance.

Deere-built PowerShift™ transmission employs durable heavy-duty clutches and bearings, for reliable performance, shift after shift.

Separate transmission, hydraulic, and axle filtration and cooling systems prevent cross-contamination for longer component life.

Blade is pre-stressed using a patented process for exceptional strength and durability.

Electrical-distribution center employs extremely reliable circuit-board technology and solid-state switches, reducing the number of wires and connectors from 72 to 5.

1. Multifunction touch pad is sealed from dirt and moisture, and proven to endure over two million cycles.
2. Enhanced monitor stores codes and gives diagnostic readings of most sensors and switches for quicker and easier troubleshooting.
3. Seven-fin-per-inch radiator and eight-fin-per-inch coolers are mounted side-by-side for efficient cooling and simplified cleanout.
4. High-strength circle and draft frame are built to withstand high-impact loads. Optional blade-impact system protects structural components from damage caused by run-ins with obstructions.

Long wheelbase provides additional balance and stability, for more accurate grading and a smoother ride, without sacrificing the D-Series' tight turning radius.

Ball-and-socket draft-frame pivot is positioned where it enables easy on-the-go blade and circle adjustments for more confidence and control when blue topping.

Substantial power and weight translate into better traction for pushing big loads. Minimizes wheel spin, too, for more precise grade work.

Moldboard curvature and generous circle torque move more material for increased productivity.

1. Circle motor's forward position keeps pinion teeth in constant mesh with the circle, minimizing backlash and wear.

2. With the optional IGC package, your grader arrives from the factory with the integrated connectivity needed to easily add an electronic grade control system of your choice.

3. Acquiring a new grader? You don't have to give up your mid-mount scarifier. Heavy-duty V-shape design of this new option provides superior ground penetration.

4. Exclusive ball-and-socket draft-frame pivot and seven-position saddle provide superior blade reach outside the tires.

A cut above the rest.

Want a machine that makes grade work simpler, more precise, and less costly? Get a D-Series. Improved working tools deliver more productivity in a wide range of applications. Moldboard curvature and generous throat clearance help move more material,

more easily. And a refined blade/tilt frame geometry significantly enhances fine-grading ability. Demo a D-Series today and find out for yourself why these Deere graders set the standard for productivity, uptime, and low daily operating costs.

Large service doors swing open wide, and daily service points are conveniently grouped on the same side for quick and convenient ground-level access.

Remote diagnostic and fluid sample ports enable technicians to do preventative maintenance and troubleshoot problems more quickly.

Easily accessible vertical engine, transmission, and hydraulic filters, plus environmentally friendly drains, simplify fluid changes.

You won't find any air tanks to bleed on a John Deere grader. Inboard wet-disc brakes are virtually maintenance free.

Sight gauges are conveniently located and easy to read, so you can check fluid levels at a glance.

Maintenance made easier.

Even the best machines need a little attention once in a while. And that's how we designed the D-Series — to be hassle-free and require even less of your time and money to maintain. Large service doors open wide for easy access to same-side service points and

help make quick work of the daily routine. Service intervals have been extended, plus numerous other timesaving features such as easy-to-replace wear inserts, quick-change filters, and designed-in diagnostics all help minimize downtime and expense.

1. Lockable compartments swing open for convenient ground-level access to maintenance-free batteries.

4. Five-hundred-hour engine oil and filter intervals further reduce the downtime scheduled for routine maintenance. Vertical filters allow quick, no-spill changes.

2. Easily replaceable super-tough nylon or bronze draft frame and circle wear inserts minimize component wear and never need greasing.

5. Unlike other graders that require far more effort and expertise, D-Series' circle wear inserts require only two hours and a $\frac{9}{16}$ -inch wrench to replace.

3. Greasing is less messy, with centralized lube banks providing easy access to difficult-to-reach zerks.

6. Moldboard employs a self-cleaning sideshift rail with easily replaced bronze wear inserts that eliminate component wear and greasing.

Final Drives

Spiral bevel differential, inboard-mounted planetary sealed in cooled, filtered oil; operator-controlled differential lock/unlock; 2-in. (51 mm) pitch tandem drive chains

Front Axle

Heavy-duty, welded box construction	
Oscillation (total)	32 degrees
Wheel Lean (each direction)	20 degrees

Brakes

Foot-controlled, hydraulically operated, multiple wet-disc brakes sealed in cooled, filtered oil; self adjusting, maintenance free; includes spring-applied, hydraulically released parking brake; both independent braking systems effective on all four tandem wheels

Hydraulic System

Type	closed center, pressure compensated load sensing (PCLS), variable-displacement piston pump, O-ring face seal fittings
Hydraulic Pump	5.5 cu. in. (90 cm ³)

Engine Power	
Gears 1–2	180 net hp (134 kW)
Gear 3	185 net hp (138 kW)
Gears 4–5	200 net hp (149 kW)
Gears 6–8	235 net hp (175 kW)
Aspiration	turbocharged with waste-gate boost pressure regulation and air-to-air aftercooler
Number of Cylinders	6
Displacement	494 cu. in. (8.1 L)
Net Torque @ 1,000 rpm	
Gears 1–2	731 lb.-ft. (991 Nm) @ 66% net torque rise
Gear 3	793 lb.-ft. (1075 Nm) @ 57% net torque rise
Gears 4–5	835 lb.-ft. (1132 Nm) @ 52% net torque rise
Gears 6–8	913 lb.-ft. (1238 Nm) @ 61% net torque rise
Lubrication	pressure system with full-flow filter and cooler
Air Cleaner with Restriction Indicator	dual element, dry, with tangential unloader
Electrical System	24 volt with 100-amp alternator
Batteries (two 12 volt)	1,400 cold-cranking amps, 440-min. reserve capacity

Steering and Articulation

All-hydraulic power frame articulation for maneuverability and productivity; crab steering reduces side drift, positions tandems on firm ground, and increases side slope stability	
Articulation (both left and right)	22 degrees
Turning Radius (front steer plus articulation)	23 ft. 0 in. (7.01 m)
Front Wheel Lean	20 degrees

- ● ● Industry preferred control pattern
- ● ● Seven-position saddle
- ● ● Four-function hydraulic control valve, right and left
- ▲ ▲ ▲ Up to six auxiliary function control valves, three right and three left
- ▲ ▲ ▲ Integrated Grade Control

Draft Frame

- ● ● Double ball and socket for extreme-reach positions left and right
- ● ● Replaceable wear inserts

Circle

- ● ● Nylon wear inserts
- ▲ ▲ ▲ Extreme-service bronze wear inserts
- ● ● 360-degree rotation
- ▲ ▲ ▲ Circle drive with slip clutch

Moldboard

- ● 12-ft. x 24-in. x 0.88-in. (3.66 m x 610 mm x 22 mm) high strength, wear resistant
- ▲ ▲ 14-ft. x 24-in. x 0.88-in. (4.27 m x 610 mm x 22 mm) high strength, wear resistant
- ▲ ▲ ▲ 12-ft. x 27-in. x 1-in. (3.66 m x 686 mm x 25 mm) high strength, wear resistant
- ▲ ▲ ▲ 13-ft. x 27-in. x 1-in. (3.96 m x 686 mm x 25 mm) high strength, wear resistant
- ▲ ● 14-ft. x 27-in. x 1-in. (4.27 m x 686 mm x 25 mm) high strength, wear resistant
- ▲ 16-ft. x 27-in. x 1-in. (4.88 m x 686 mm x 25 mm) high strength, wear resistant
- ● Standard-duty wear inserts
- ▲ ▲ ● Extreme-service wear inserts

Cutting Edge

- ● 0.62-in. x 6-in. (16 mm x 152 mm) Dura-Max® through-hardened steel
- ▲ ▲ ● 0.75-in. x 8-in. (19 mm x 203 mm) Dura-Max through-hardened steel

670 770 870 Front Attachments

- ▲ ▲ ▲ Push block
- ▲ ▲ ▲ Front weight, 550 lb.
- ▲ ▲ ▲ V-type scarifier with float position, 5 shanks
- ▲ ▲ ▲ Mid-mount scarifier with float position, 11 shanks
- ▲ ▲ ▲ Auxiliary hydraulics for front-mounted equipment

Rear Attachments

- ▲ ▲ ▲ Ripper/scarifier combination with parallelogram linkage
- ▲ ▲ ▲ Bottom guard
- ▲ ▲ ▲ Side panels for bottom guard

Tires and Rims

- ● ▲ Single-piece rims
- ▲ ▲ ● Three-piece rims
- ▲ ▲ 13.00-24, 12 PR G2
- ▲ ▲ 14.00-24, 12 PR G2
- ▲ ▲ ▲ 17.5-25, 12 PR L2
- ▲ ▲ ● 14.00-R24, Radial
- ▲ ▲ ● 17.5-R25, Radial

Operator's Station

- ● ● Low-profile ROPS cab with air conditioning and heater
- ▲ ▲ ▲ ROPS canopy
- ▲ ▲ ▲ Full-height ROPS cab with air conditioning and heater
- ● ● Adjustable front console with tilt steering wheel
- ● ● Gauges: Fuel level / Engine coolant temperature / Rear steer indicator / Transmission and hydraulic temperature
- ● ● Monitor system with warning lights: Park brake on / Service brake pressure and/or audible alarm / Hydraulic oil temperature / Transmission oil temperature / Engine oil pressure / Alternator voltage / Differential lock filter restriction / Engine air filter restriction / Wait to start (cold start) / Transmission oil filter restriction / Hydraulic oil filter restriction / Differential lock engaged / Saddle lock pin disengaged / Service code warning
- ● ● Selectable display on monitor: Transmission gear and direction / Vehicle speed (mph) / Vehicle speed (km/h) / Engine speed (rpm) / Hourmeter / Alternator voltage / Service codes
- ● ● Indicators: Turn signal / Four-way flasher
- ● ● Instrument lights
- ● ● Interior lights
- ● ● Rearview mirrors (SAE J985): Exterior (2) / Interior
- ● ● Deluxe mechanical-suspension seat with adjustable armrests
- ▲ ▲ ▲ Deluxe air-suspension seat with adjustable armrests
- ● ● Retractable seat, 3 in., SAE J386
- ● ● Tinted glass
- ▲ ▲ ▲ Wipers for lower-front windows
- ● ● Front and rear windshield washers with intermittent wipers
- ▲ ▲ ▲ Openable lower-front windows
- ● ● Rear window electrical defroster
- ▲ ▲ ▲ Radio, AM/FM/weatherband
- ▲ ▲ ▲ Radio, AM/FM/weatherband with cassette
- ▲ ▲ ▲ Radio, AM/FM/weatherband with CD
- ▲ ▲ ▲ Heated outside mirrors
- ● ● Floor mat

DKADGDRD Litho in U.S.A. (07-09)

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan at test conditions specified per ISO9249. No derating is required up to 10,000-ft. (3050 m) altitude.

Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on units with standard equipment: 670D and 770D units with 12-ft. x 24-in. x 0.88-in. (3.66 m x 610 mm x 22 mm) high-strength, wear-resistant moldboards with 0.62-in. x 6-in. (16 mm x 152 mm) Dura-Max through-hardened-steel cutting edges; 670D unit with 14.00-24, 12 PR G2 tires; 770D unit with 14.00-R24, Radial tires; and 870D unit with 17.5-R25 radial tires and 14-ft. x 27-in. x 1-in. (4.27 m x 686 mm x 25 mm) high-strength, wear-resistant moldboard with 0.75-in. x 8-in. (19 mm x 203 mm) Dura-Max through-hardened steel cutting edge. Weights include lubricants, coolants, full fuel tanks, and 175-lb. (79 kg) operators.
