

Doosan NEW 7A SERIES

CRAWLER EXCAVATOR Applied Tier III Engine

360LC-7A

Robex 360LC-7A

Built for Maximum Power, Performance and Reliability.

A new chapter in construction equipment has now begun.
Making the dream a reality.

Rolex 360LC-7A

Operator's Comfort is Our Main Concern. Wide Cab Exceeds Industry Standards.

Technology in Cab Design

Visibility

- Even more visibility than before, for safer, more efficient operation.

Excellent Ventilation

- Ventilation has been improved by the addition of a larger fresh air intake system and by providing additional air flow throughout the cab.
- Sliding front and side windows provide improved ventilation.
- A large sunroof offers upward visibility and additional ventilation.

Comfortable Operator Environment

- The control levers and seat can be adjusted to provide maximum operator comfort.
- The seat is fully adjustable for optimum operating position, reducing operator fatigue.
- Console boxes slide forward and backward for improved accessibility.
- The proportional pressure controls reduce unnecessary exertion while ensuring precise operation.
- Large windows allow excellent visibility in all directions.

Low noise design

- The Robex 7A series is designed with low operation noise in mind.
- Hyundai engineering made efforts to keep interior and exterior noise levels to a minimum.
- The cab's noise levels have been additionally reduced by improving the door seals for the cab and engine compartments.
- An insulated diesel engine compartment with sound-damping material also reduces noise.

| 1 | Wide, Comfortable Operating Space |
| 2 | Steel Cover Sunroof |
| 3 | Dial Type Engine Speed Switch and / Key Switch |

Radio CD Control

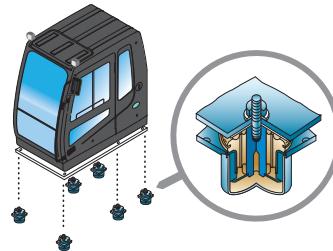

Robex 360LC-7A

Improved Intelligent Display

Instrument Panel is installed in front of RH console box. It is easy to check all critical systems with easy-to-read indicators.

Minimization of Shock and Vibration through a Cab Mounting System

The application of the Viscous Mounting system to the cabin support provides the operator with a smoother ride. The operator work efficiency will increase as the shock and noise level in the cabin decreases.

Operating Environment

▲ Storage box and Cup Holder

An additional storage box and cup holder are located behind operator's seats so to food and beverages cool or hot.

◀ Wide Cab with Excellent Visibility

The cab is roomy and ergonomically designed with low noise level and a good visibility. A full view front window and large rear and side windows provide excellent visibility in all directions.

Wide, Comfortable Operating Space

All the controls are designed and positioned according to the latest ergonomic research. Reinforced pillars have also been added for greater cab rigidity.

Smooth Travel Pedal and Foot Rests

Maximum Protection

Highly Sensitive Joystick and Easy Entrance

New joystick grips for precise control have been equipped with double switches.

- | | |
|-------|---|
| Left | <ul style="list-style-type: none"> • Power boost • One touch deceleration • Optional (2) |
| Right | <ul style="list-style-type: none"> • Horn • Optional (3) |

Easy-to-Reach Control Panels

Switches and other essential controls are located near the operator. This helps to keep operator movements to a minimum, enhancing control with less operator's fatigue.

Rear Emergency Exit Window

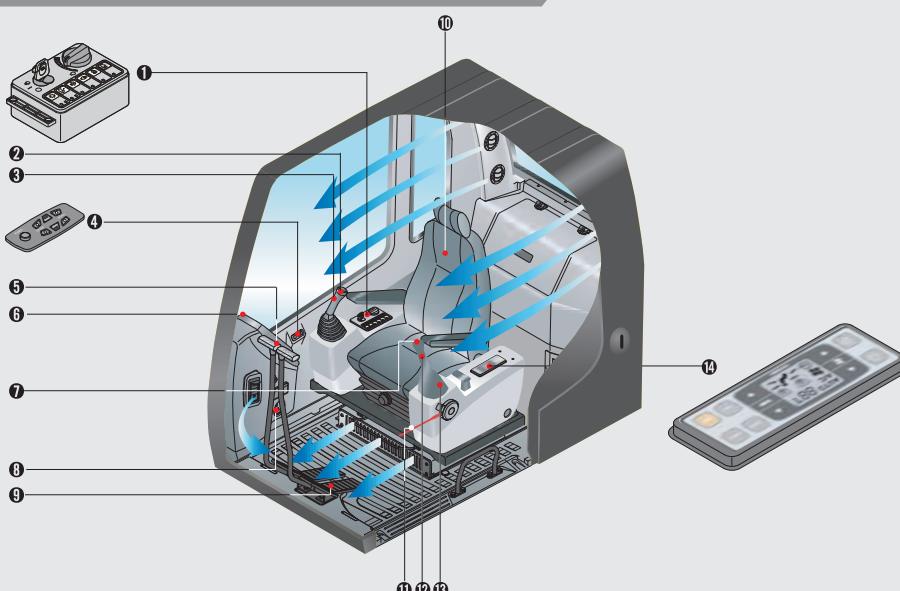

Rear Exit Window is designed to provide an easy exit in emergency cases.

Raise-up Wiper and Cabin Lights

Raise-up wiper installed to enhance a better front view. Cabin Lights enhances safety by brightly lighting the surroundings in dark environments. (optional)

The better working conditions in a pleasant environment

- ① Centralized control panel
- ② Horn button
- ③ Option button
- ④ Remote Radio control
- ⑤ Travel lever
- ⑥ Cluster
- ⑦ One touch decel button
- ⑧ Hour meter
- ⑨ Travel pedal
- ⑩ Fully adjustable suspension seat
- ⑪ Safety lever
- ⑫ Power boost button
- ⑬ Joystick control lever
- ⑭ Air Conditioner and Heater controller

Automatic Engine Overheat Prevention

If the engine coolant temperature gets too high, the CPU controller lowers the engine speed and cools the engine.

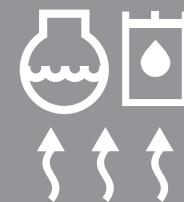

Anti Restart System

The new system protects the starter from re-starting during engine operation, even if the operator accidentally turns the start key again.

Power boost control System

When the power boost system is activated, digging power increases about 10%. It is especially useful when extra power is temporarily needed, for instance, when digging hard earth and rock.

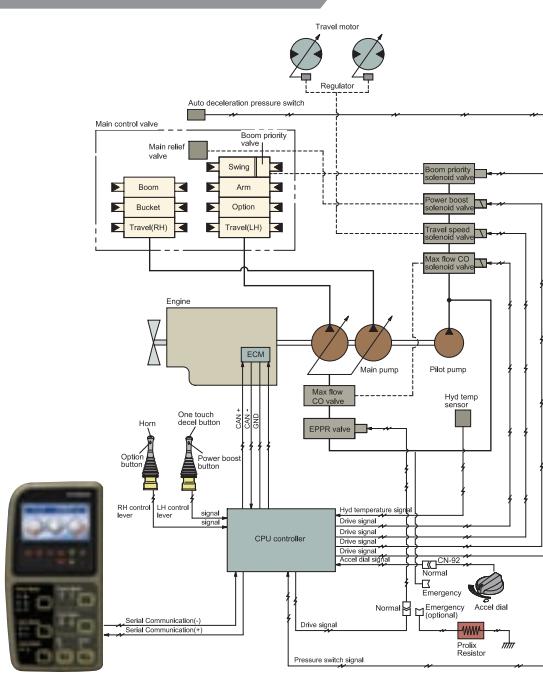

Automatic Warming-up System

After the engine is started, if the engine coolant temperature is low, the CPU controller increases the engine speed and automatically increases the pump flow rate so to warm up the engine more effectively.

Advanced Hydraulic System

ADVANCED CAPO SYSTEM

The advanced CAPO (Computer Aided Power Optimization) system maintains engine and mutual pump power at optimum levels. Mode selections are designed for various work loads, maintaining high performance while reducing fuel consumption. Features such as auto deceleration and power boost are included in the system. The system monitors engine speed, coolant temperature, and hydraulic oil temperature. Contained within the system are self diagnostic capabilities which are displayed by error codes on the cluster.

Self Diagnosis System

The CPU controller diagnoses problems in the CAPO system caused by electric and hydraulic malfunctions and displays them on the LCD monitor of the cluster through error codes. This controller has the capacity to identify 48 distinct types of errors. The information from this device, such as engine rpm, main pump delivery pressure, battery voltage, hyd. temperature, and the state of all types of electric switches, provides the operator with an exact condition of the machine. This instrument makes it easier to troubleshoot the machine in case of failure.

One Touch Deceleration System

When the one touch deceleration switch is pressed, the CPU controller controls the accelerator actuator to reduce engine speed to 800 rpm. Once this switch is pressed again, the engine speed recovers to its preset RPM.

Pump Flow Control System

In neutral position: Pump flow is reduced to a minimum to eliminate power loss.
In operation: Maximum pump flow is delivered to the actuator to increase the speed. With movement of the control lever, pump flow is automatically adjusted and the actuator speed can be proportionally controlled.

Boom & Arm Holding System

The Holding valves in the main control valve prevents the boom & arm from dropping over an extended period in neutral position.

Arm Flow Regeneration System

Arm flow regeneration valve provides smooth arm-in operation without cylinder cavitation.

Hydraulic Damper in Travel Pedal

Improved travel controllability & feeling during movement of the machine by use of shock reducing material.

NEW MODE CONTROL SYSTEM

1 POWER MODE

H mode: High power
S mode: Standard power

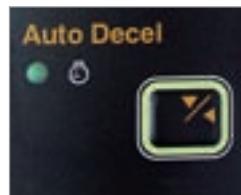

2 WORK MODE

- Heavy duty work
- General work
- Breaker

3 USER MODE

M mode: Maximum Power
U mode: Memorizing Operator's Preferable Power Setting

Auto Deceleration System

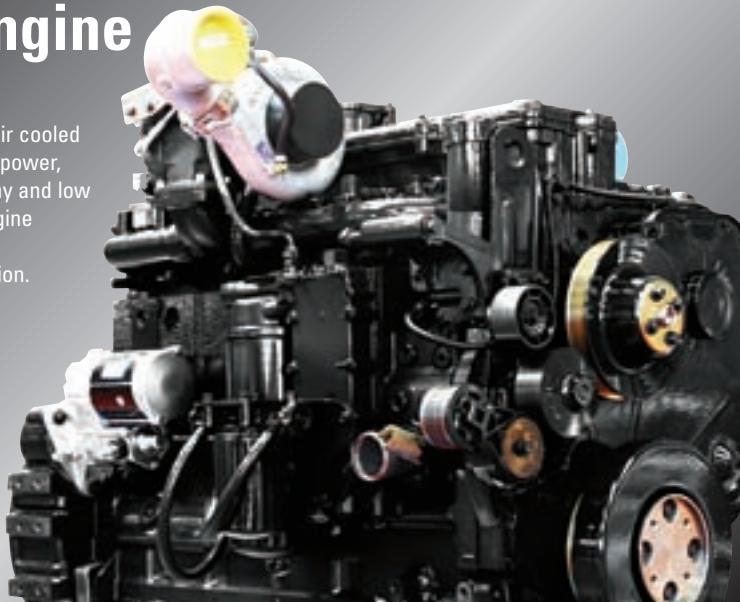

When remote-control valves are in neutral position more than 4 seconds, the CPU controller instructs the accelerator actuator to reduce engine speed to 1000 rpm. This decreases fuel consumption and reduces cab noise levels.

Max. Flow Cut-off System

For precise control and finishing work, the Max. Flow Cut-off System reduces pump flow, thus allowing smooth operation.

CUMMINS QSL Engine

The six cylinders, turbocharged, 4 cycle, charger air cooled engine is built for power, reliability, economy and low emission. This engine meets Tier III emissions regulation.

Heavy-duty strength

Everyone who's ever worked on construction equipment machines knows, there is no substitute for power and durability. The QSL handles the toughest loads and the roughest working conditions. At the same time, it delivers better fuel economy, has better cold starting capability and is up to 50% quieter in operation. The heavy-duty design of the QSL engine block and components such as articulated pistons, enhanced camshaft and roller cam followers, viscous damper and high capacity lube system add reliability and durability you can count on every day, year after year. Both fuel-efficiency and response are significantly enhanced with the Cummins high pressure common rail fuel system. The system delivers a continuous high pressure injection independent of engine speed for optimum performance and flexibility at every rpm.

Increased Higher Performance

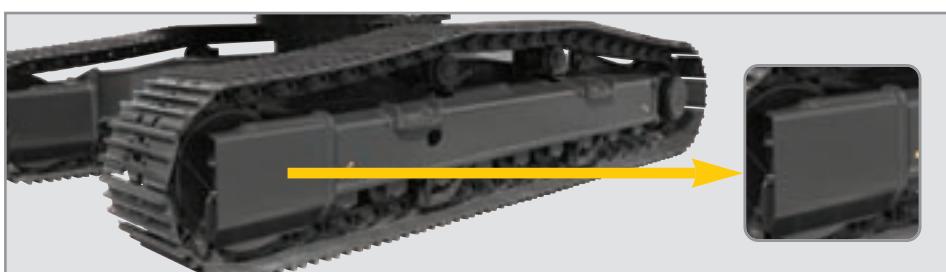

Strong and Stable Lower Frame

Reinforced box-section frame is all welded using low-stress, high-strength steel. It guarantees safety and resistance against external impact when driving on rough ground or working on wet sites. The use of highly durable upper and lower rollers and track guards ensures proper machine transfer on all terrains. The long undercarriage incorporates heavy duty excavator style components. An X-leg type center frame is integrally welded for maximum strength and durability.

Reinforced Bucket and Bucket Linkage

To prevent excessive wear of pins and bushes, sealed joints have been applied. Bucket link design incorporates high durability and anti wear characteristics. Additional reinforcement plates on cutting edge section are welded. Thicker steel and an additional lateral plate are put in place to reinforce the bucket.

Track Rail Guide & Adjusters

Durable track rail guides keep track links in place. Track adjustment is made easy by using a standard grease operated cylinder track adjusters including shock absorbing springs. (Full Track Guide: Option)

Powerful and Precise Swing Control

Improved shock absorbing characteristics make stopping swing movement a precise and smooth action.

Full open doors and the use of one master key system provide easy access during servicing.

Reliability & Serviceability

Side Cover with Left & Right Swing Open Type

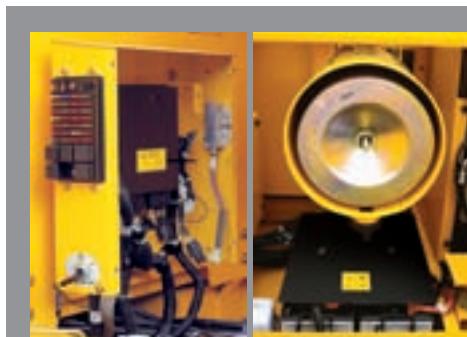

Easy access to vital components gives unrestricted view of components allowing easy maintenance and repair.

Easy to maintain engine components

A cooling and preheating system are provided for optimum and immediate operation, guaranteeing longer life for the engine and hydraulic components.

Servicing of the engine and hydraulics is considerably simplified due to total accessibility.

Centralized Electric Control Box and Easy Change Air Cleaner Assembly

Electric control box and air cleaner are centralized in one and the same compartment for easy service.

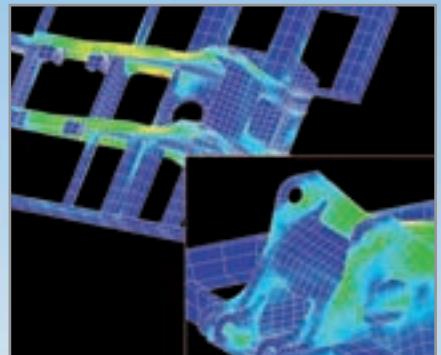

Highly efficient Hydraulic Pump

Pump output capacity has been increased.

Large tool box for extra storage

Durability of structure proven through FEM (Finite Element Method) analysis and long term durability test.

Specifications

Engine

Model			Cummins QSL
Type			Water cooled, 4 cycle Diesel, 6-Cylinders in line, direct injection, turbocharged, charged air cooled and low emission
Rated flywheel horse power	SAE	J1995 (gross)	221 kW (296 HP) at 1,850 rpm
		J1349 (net)	202 kW (271 HP) at 1,850 rpm
DIN	6271/1 (gross)	221 kW (300 PS) at 1,850 rpm	
	6271/1 (net)	202 kW (275 PS) at 1,850 rpm	
Max. torque			1,383 Nm (1,000 lbf.ft) at 1,400 rpm
Bore x stroke			114 x 144.5 mm (4.5" x 5.3")
Piston			8,900 cc (540 cu in)
Batteries			2 x 12 V x 160 AH
Starting motor			24 V - 7.5 kW
Alternator			24 V - 50 Amp

Hydraulic system

Main pump	
Type	Two variable displacement piston pumps
Max. flow	2x288 l/min (76.6 US gpm / 63.8 UK gpm)
Sub-pump for pilot circuit	Gear pump
Cross-sensing and fuel saving pump system	
Hydraulic motors	
Travel	Two speed axial piston motor with brake valve and parking brake
Swing	Axial piston motor with automatic brake
Relief valve setting	
Implement circuits	32,4 MPa (4,690 psi)
Travel	32,8 MPa (4,765 psi)
Power boost (boom, arm, bucket)	35,3 MPa (5,120 psi)
Swing circuit	25,5 MPa (3,700 psi)
Pilot circuit	3,4 MPa (500 psi)
Service valve	Installed
Hydraulic cylinders	
No. of cylinder - bore x rod x stroke	Boom: 2-160 x 110 x 1,500 mm (6.3" x 4.2" x 59.1") Arm: 1-170 x 120 x 1,760 mm (6.7" x 4.7" x 69.3") Bucket: 1-150 x 105 x 1,295 mm (5.9" x 4.1" x 51.0")

Drives & Brakes

Drive method	Fully hydrostatic type
Drive motor	Axial piston motor, in-shoe design
Reduction system	Planetary reduction gear
Max. drawbar pull	310 kN (68,350 lbf)
Max. travel speed (high) / (low)	4.8 km/hr (2.8 mph) / 3.0 km/hr (2.0 mph)
Gradeability	35° (70 %)
Parking brake	Multi wet disc

Control

Pilot pressure operated joysticks and pedals with detachable lever provide almost effortless and fatigueless operation.

Pilot control	Two joysticks with one safety lever (LH): Swing and arm, (RH): Boom and bucket (ISO)
Traveling and steering	Two levers with pedals
Engine throttle	Electric, Dial type
External Lights	Two lights mounted on the boom one under the battery box

Swing System

Swing motor	Axial piston motor
Swing reduction	Planetary gear reduction
Swing circuit lubrication	Grease-bathed
Swing brake	Multi wet disc
Swing speed	9.0 rpm

Coolant & Lubricant Capacity

(refilling)	liter	US gal	UK gal
Fuel tank	520	137.4	114.4
Engine coolant	45.0	11.9	9.9
Engine oil	31.7	8.4	7.0
Swing device	8.0	1.6	1.3
Final drive (each)	7.0	1.8	1.5
Hydraulic system	380	100.4	83.6
Hydraulic tank	230	60.8	50.6

Undercarriage

X-leg type centre frame is integrally welded with reinforced box-section track frames. The undercarriage includes lubricate rollers, idlers, track adjusters with shock absorbing spring and sprockets. Track chains with double or triple grouser shoes.

Centre frame	X - leg type
Track frame	Pentagonal box type
No. of shoes on each side	51
No. of carrier roller on each side	2
No. of track roller on each side	9
No. of track guard on each side	2

Operating Weight (approximate)

Operating weight, including 6,500 m (21' 4") boom; 3,200 m (10' 6") arm, SAE heaped 1.62 m³ (2.12 yd³) backhoe bucket, lubricant, coolant.

Major component weight		
Upper structure	8,500 kg (18,740 lb)	
Counterweight	6,500 kg (14,330 lb)	
Boom (with arm cylinder)	3,780 kg (8,330 lb)

NOTES

- Lifting capacity is based on SAE J1097, ISO 10567.
- Lifting capacity of the Robex Series does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity.
- The load point is a hook (standard equipment) located on the back of the bucket.
- (*) indicates load limited by hydraulic capacity.

NOTES

1. Lifting capacity is based on SAE J1097, ISO 10567.

2. Lifting capacity of the Robex Series does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity.

3. The load point is a hook (standard equipment) located on the back of the bucket.

4. (*) indicates load limited by hydraulic capacity.

Notes

Robex 360LC-7A

Standard Equipment

ISO standard cabin

- All-weather steel cab with all-around visibility
- Safety glass windows
- Rise-up type windshield wiper
- Sliding fold-in front window
- Sliding side window
- Lockable door
- Hot & cool box
- Accessory box & Ash-tray

Computer Aided Power

Optimization (New CAP0) system

- 2-power mode, 3-work mode, 2-user mode
- Auto deceleration & one touch deceleration system
- Auto warm up system
- Auto overheat prevention system

Air-conditioner (5,000 kcal/hr; 20,000 BTU/hr)

FATC (Full Automatic Temperature Control)

Self diagnostic system

AM/FM radio and CD Player

- Radio remote switch

Centralized monitoring

- LCD display
- Engine speed
- Clock & Error code
- Gauges
- Fuel level gauge
- Engine coolant temperature gauge
- Hyd. oil temperature gauge
- Warning
- Fuel level
- Check Engine & CPU
- Engine oil pressure
- Engine coolant temperature
- Hyd. oil temperature
- Low battery
- Air cleaner clogging
- Indicator
- Power max.
- Preheat & Engine warming-up
- One touch deceleration

Starting Aid (Air grid heater) Cold Weather

Door and cab locks, one key

Two outside rear view mirrors

Sun visor for cabin inside

Fully adjustable suspension seat with seat belt

Slidable joy-stick, pilot-operated

Console box tilting system (L.H.)

Three front working lights

Electric horn

Batteries (2 x 12 V x 160 AH)

Battery master switch

Removable clean out screen for Hyd. oil cooler

Automatic swing brake

Removable reservoir tank

Fuel pre-filter

Boom holding system

Arm holding system

Safety lock valve for boom cylinder with overload warning device

Counterweight (6,500 kg; 14,330 lb)

Mono boom (6.5 m; 21' 4")

Arm (3.2 m; 10' 6")

Single acting piping kit (breaker, etc)

Double acting piping kit (clamshell, etc)

Track shoes (600 mm; 23.6")

Track rail guard

Travel alarm

Fuel warmer

Fuel filler pump (35 l/min; 9.2 US g/m)

Optional Equipment

Heater & Defroster (7,500 Kcal/hr; 30,000 BTU/hr)

Beacon lamp

Safety lock valve for arm cylinder

Accumulator, work equipment lowering

12 volt power supply (24 V DC - 12 V DC converter)

Electric transducer

Various optional Arms

- Short arm (2.50 m; 8' 2")
- Long arm (3.90 m; 12' 10")
- Long arm (4.30 m; 14' 1")
- Super long arm (5.10 m; 16' 9")

Various optional Buckets (SAE heaped)

- Standard bucket (1.62 m³; 2.12 yd³)
- Narrow bucket (1.15 m³; 1.5 yd³)
- Narrow bucket (1.46 m³; 1.91 yd³)
- Light duty bucket (1.86 m³; 2.43 yd³)
- Light duty bucket (2.10 m³; 2.75 yd³)
- Light duty bucket (2.32 m³; 3.03 yd³)
- Heavy duty bucket (1.62 m³; 2.12 yd³)
- Rock bucket (1.44 m³; 1.88 yd³)
- Rock bucket (1.62 m³; 2.12 yd³)
- Rock bucket (1.86 m³; 2.43 yd³)

Cabin lights

Cabin FOPS/FOG (ISO 10262)

Cabin Roof-Cover Transparent

Track shoes

- Triple grousers shoe (700 mm; 28")
- Triple grousers shoe (750 mm; 30")
- Triple grousers shoe (800 mm; 32")
- Triple grousers shoe (900 mm; 36")

Side cowl

Louver type side door (L/H)

Lower frame under cover

Preheating system

Tool kit

Operator suit

Seat

- Adjustable air suspension seat

Standard and optional equipment may vary. Contact your Hyundai dealer for more information. The machine shown may vary according to International standards.
All US measurement rounded off to nearest pounds or inches.
